Building Modern Distributed Systems with Java, Udemy

Practical Java Concurrency with the Akka Actor Model, Udemy

RabbitMQ Java Spring Boot for System Integration, Udemy

GRPC with Java, Udemy

Data Structures and Algorithms, Udemy

PROJECTS

Game Star Exchange

📅 10/2022 - 03/2023 📍 Location
🔗 app.gamestar.exchange

Game Star is a P2P Platform for Digital/Physical Trading.

- Improve the platform performance.
- Improved user experience

Wakacast

📅 2021 📍 Remote
🔗 www.wakacast.com

Built, Tested, Deployed Maintained the backend. Managed the infrastructures.

- 100,000+ users signed up.
- More than 40% got employed via the platforms.

E-Health Care System

📅 2022 - 2022 📍 Remote

Design and Implemented the Product requirements with the help of team members.

- Improve speed to health cares access to patients.
- Reduced cost for patients.

Zumaridi Video Conferencing App

📅 2021 - 2022 📍 Remote

Built, Tested, Deployed Maintained the backend

- Build a video conferencing application for African based individuals.

Let's talk

📅 2021 - 2021 📍 Benin, Nigeria
🔗 <https://github.com/demoxie/lets-talk>

A simple blogging application

- A Blog that enable users to interact in a topic.

School Management Web App

📅 2020 - 2021 📍 Gombe

Design and Build the backend and frontend using PHP and CSS/HTML

- 25 School registered
- Reduced running cost of registered schools by 40%.

ACHIEVEMENTS

Won The Best Team Player of the year

This proves the servant leader ability in me.

Best Express Article, Espresso Decagon

This adds to my technical writing skills.
